## 1-4. (canceled)

- 5. (previously presented): A zinc finger complex, comprising two or more fusion proteins, each fusion protein comprising a zinc finger protein that binds to DNA in a sequence-specific manner and a peptide linker, wherein the zinc finger proteins of the fusion proteins are joined to each other by specific binding of the peptide linkers, and wherein the peptide linkers are non-naturally occurring peptide linkers of 30 amino acids or less in length.
- 6. (previously presented): The zinc finger complex of claim 5, wherein the peptide linker of each fusion protein is the same.

## 7-19. (canceled)

- 20. (previously presented): The zinc finger complex of claim 5, wherein the zinc finger protein of each fusion protein has the same sequence.
- 21. (previously presented): The zinc finger complex of claim 5, wherein the peptide linker is between 8 and 25 amino acids in length.
